

Layer F.Cu on board PSU-A represents wire links.
Layer Inner2.Cu on board PSU-B/Sig represents wire links.
Use insulated screws for PSU-A.

ADC1: External PSU, internal PSU, and signal processing circuitry. Designed for use with TI PCM4222EVM ADC board. v1.0 (C) Mark Pinese 2014 Design licensed under Creative Commons BY-SA v4.0 http://creativecommons.org/licenses/by-sa/4.0/
